European
University

CHARM-EU and its educational and research principles are grounded in the transdisciplinarity. We bring multiple disciplines together with students and extra-academic actors to examine challenges, synthesise approaches and mobilise to take action.

When talking about challenges, sustainability is probably the first one that comes to mind.

The European Green Deal is Europe's plan to make the EU's economy sustainable by turning climate and environmental challenges into opportunities, and by making the transition just and inclusive for all. To overcome these challenges, Europe needs a new growth strategy that will transform the EU into a modern, resource-efficient and competitive economy, where there are no net emissions of greenhouse gases by 2050.

CHARM-EU & THE GREEN DEAL

CHARM-EU aims to provide the skills and knowledge needed to understand and solve complex sustainable challenges such as the issues described in the Green Deal Action Plan.

Through a new educational model, CHARM-EU aims to prepare a new generation of leaders, innovators and entrepreneurs. A new generation that changes society in a sustainable direction.
