# CHARM European University

- Aims: to build a new and innovative university model and didactic concept, including all aspects of operation
- Pilot it with one full master's programme
- New partners:
  - University of Würzburg;
  - Åbo Akademi University;
  - Hochschule Ruhr West

# European joint degree master 90 EC

September 2021 (70 students)  
September 2022 (100 students)

## MASTERS IN GLOBAL CHALLENGES FOR SUSTAINABILITY

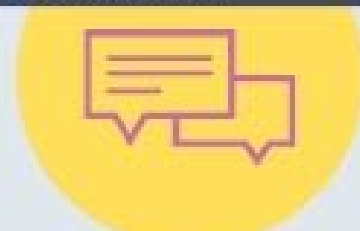

Co-funded by the  
Erasmus+ Programme  
of the European Union

### Phase 1: Preparatory COMPULSORY

#### 10 ECTS MODULE

social innovation

Phase 1 Content  
Creating Team

#### 10 ECTS MODULE

sustainability

#### 10 ECTS MODULE

transdisciplinary research

### Phase 2: Flexible STUDENTS CHOOSE ONE THEME

#### Theme 1: Life & Health

10 ECTS  
MODULE

10 ECTS  
MODULE

10 ECTS  
MODULE

Knowledge  
Creating Team 1

#### Theme 2: Water

10 ECTS  
MODULE

10 ECTS  
MODULE

10 ECTS  
MODULE

Knowledge  
Creating Team 2

#### Theme 3: Food

10 ECTS  
MODULE

10 ECTS  
MODULE

10 ECTS  
MODULE

Knowledge  
Creating Team 3

### Phase 3: Capstone COMPULSORY

#### 30 ECTS MODULE

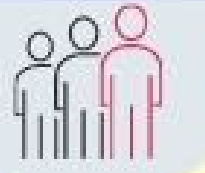

extra-academic actors

authentic, situated  
learning

Knowledge  
Creating Teams

challenge-driven

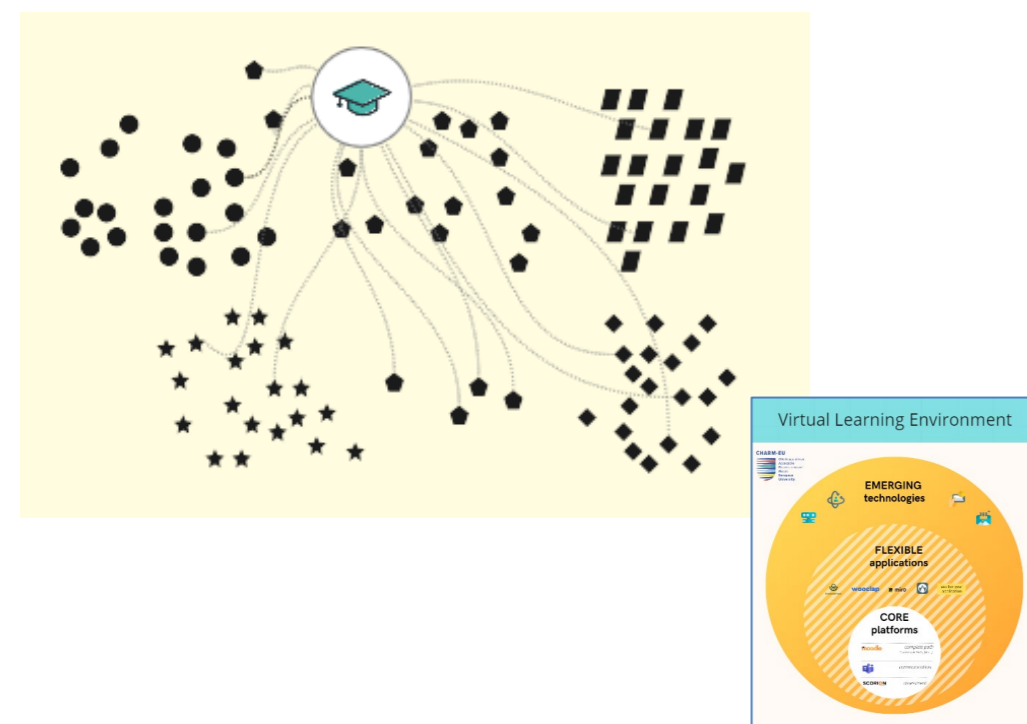

- **Virtual campus (physical mobility)**
- **Virtual Learning Environment**
- **Hybrid classroom**
- **Technology enhanced**
- **Programmatic assessment**

# Virtual Campus and Teaching modalities

## Online – In class

### ONLINE

- Just the VLE in use

### IN CLASS – 5 locations (synchronously and asynchronously)

- VLE and Hybrid Classroom in use
- 5 uni's – 5 HC
- Students divided over 5 locations
- Virtual mobility
- Physical short term mobilities optional
- Physical long term mobility is mandatory

# Building the pilot version of the VLE

## OUR OBJECTIVE

- Explore what the ideal VLE for CHARM-EU is
- Realize a pilot version of the VLE

## BUILDING ON

- Pedagogical requirements
- Educational principles

Challenge-based

Research-led  
Research-based

Sustainability

Technology  
Enhanced

Student-  
Centred

Situated  
Learning

Transversal  
Skills

Trans-  
disciplinarity

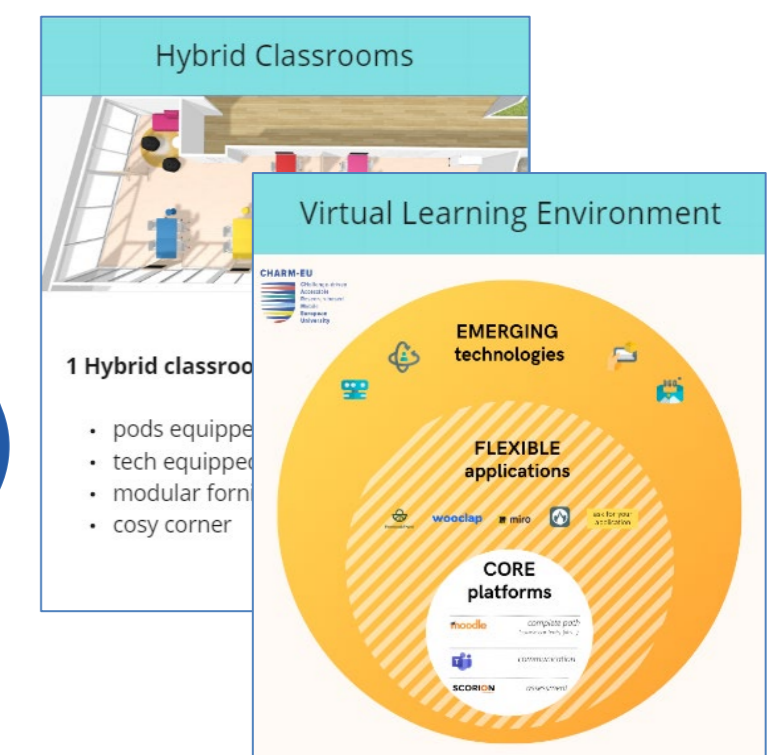

Transnational  
& Intercultural

Inclusivity

## ALIGNING WITH

- Emerging technologies
- Hybrid Classrooms (added later)

# VLE - Core requirements

---

## Sustainable

Re-use what we already have

---

## Secure and GDPR compliant

In line with EU policies

---

## Open source

Where possible

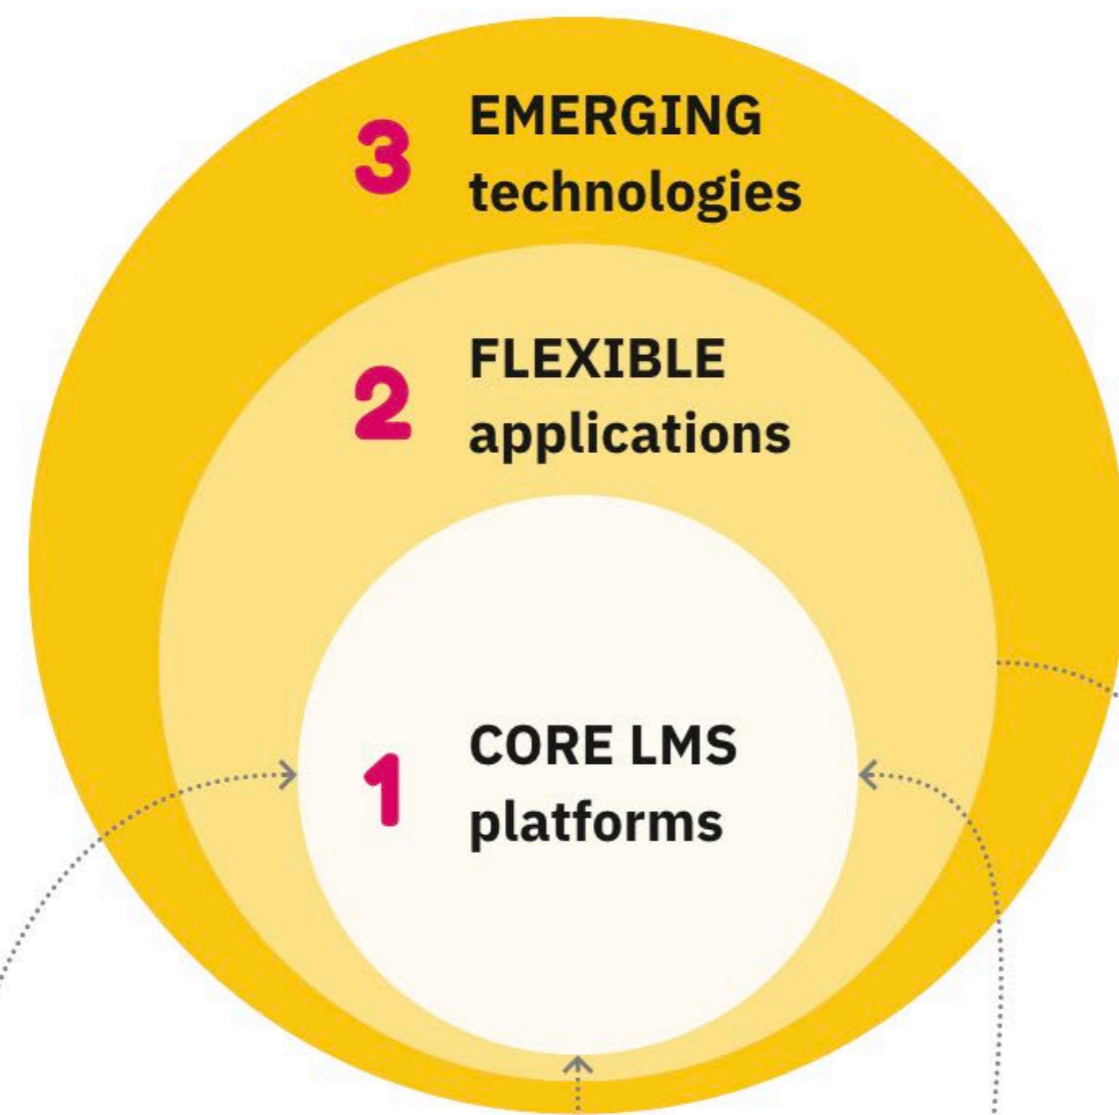

---

## User-friendly and digitally accessible

# Summary of the VLE

*“The CHARM-EU VLE is a **digital ecosystem** consisting of various educational **tools and services** that work seamlessly together to support students and lecturers in their educational activities”*

NICE TO HAVE

4 Student Information System

5 Open Educational Repository

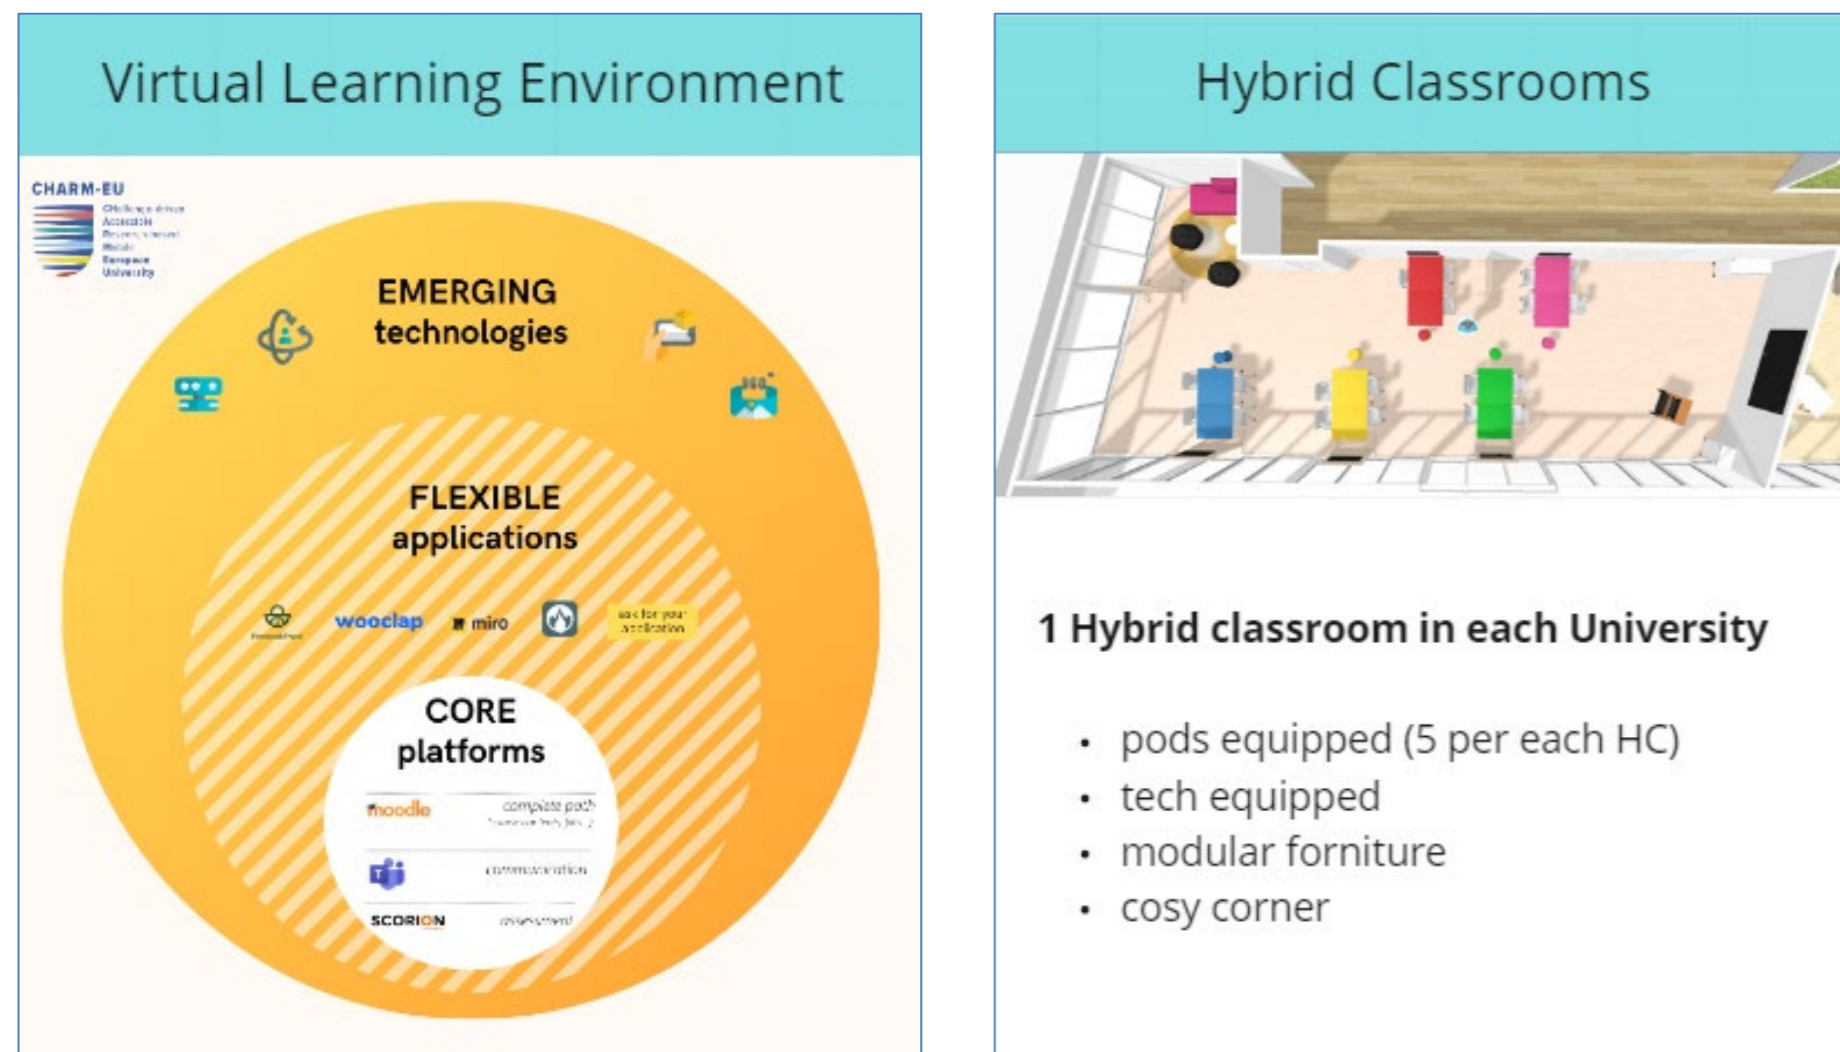

6 Learning Record Store and Visualization Engine

1. **A core LMS platform** offering functionality every teacher will need
2. **A toolbox of applications** that is effective and can optionally be used.
3. **Emerging technologies** that can be used stand-alone.

# Overview of the teaching and learning environment

VLE + Emerging technologies + Hybrid Classrooms

**Earpods (with microphone)**

**Personal computer**

- With integrated camera
- HDMI or USB-C output

Student and teachers personal equipment.

# Overview of the teaching & learning environment

## Hybrid Classrooms

### 1 Hybrid classroom in each University

- pods equipped (5 per each HC)
- tech equipped
- modular furniture
- cosy corner

In CHARM-EU, each partner university has a dedicated classroom to welcome CHARM-EU students and to run activities.

5 hybrid classrooms (1 in each university), each class accommodates up to 25 students.

# What will you find in your HC?

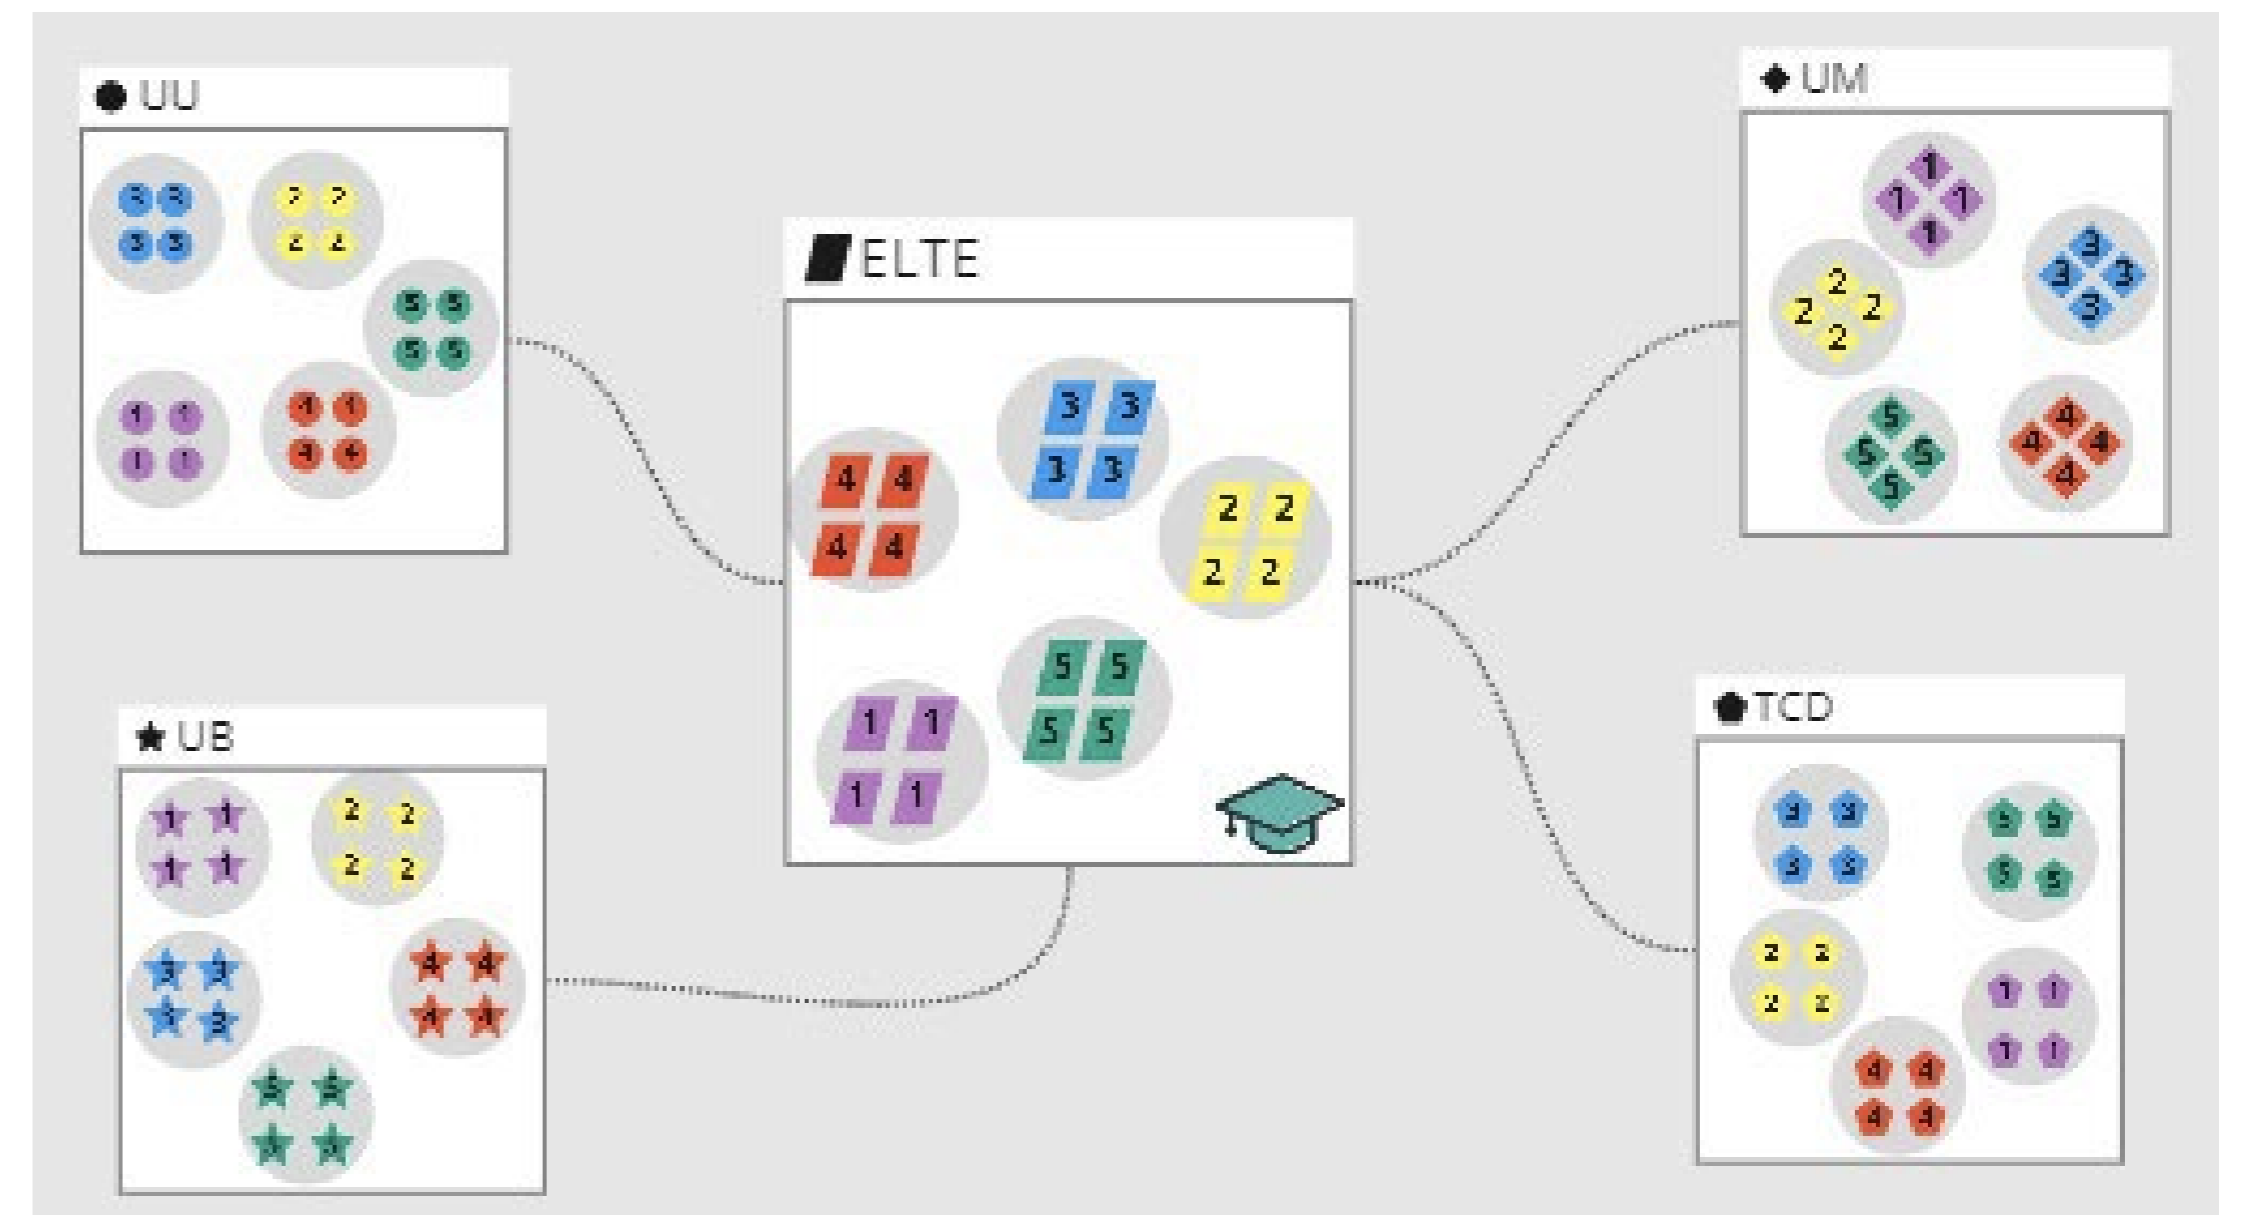

## TECH EQUIPMENT

- For plenary, groupwork and specific activities.
- Equal offer on the 5 campuses

## PODS, why pods?

- Facilitate participation during plenary session (large screens)
- Students group work
- Castors: flexibility of classroom setting

# Emerging technology selection

## Technology enhanced learning

- Virtual reality
- Augmented reality
- Mixed reality

Showcases as:

- *Sustainability game,*
- *(gamified) fieldtrips,*
- *virtual lab for sustainable watermanagement,*
- *presentation skills training.*

## Technology and assessment

- Assessment and mixed reality
- Skilltrack to reflect upon transversal skills

## Technology and inclusion

- Image recognition
- Speech recognition

## Future vision

- Remote labs
- Virtual teaching assistant
- Automatic and incremental grading
- Student centered course planner
- Etc.

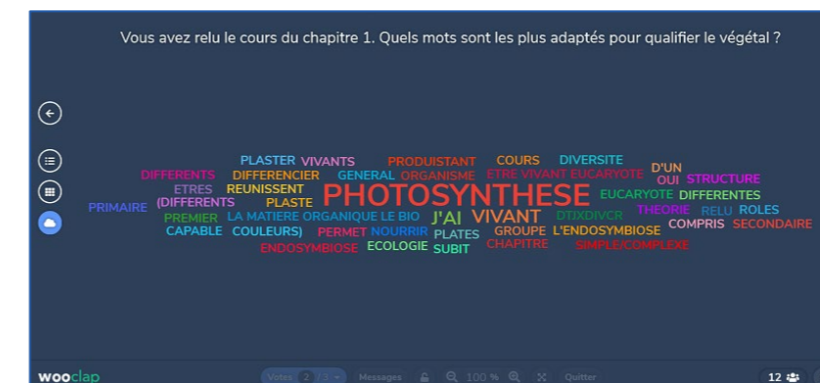

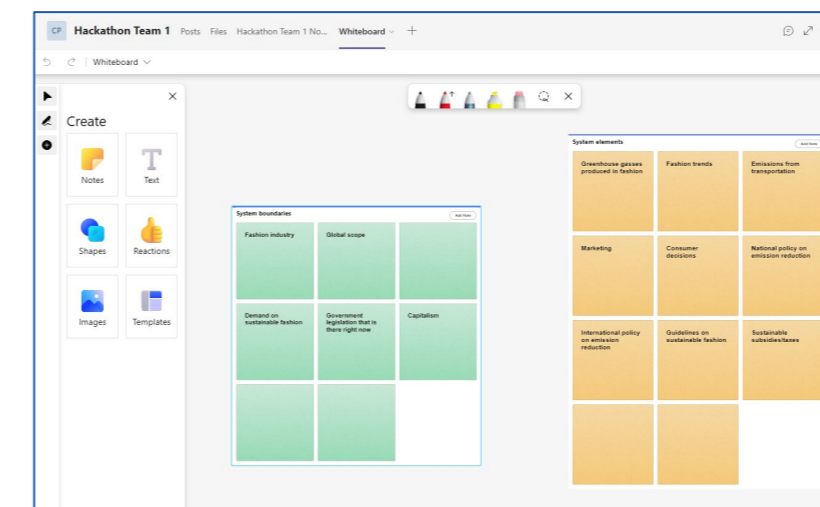

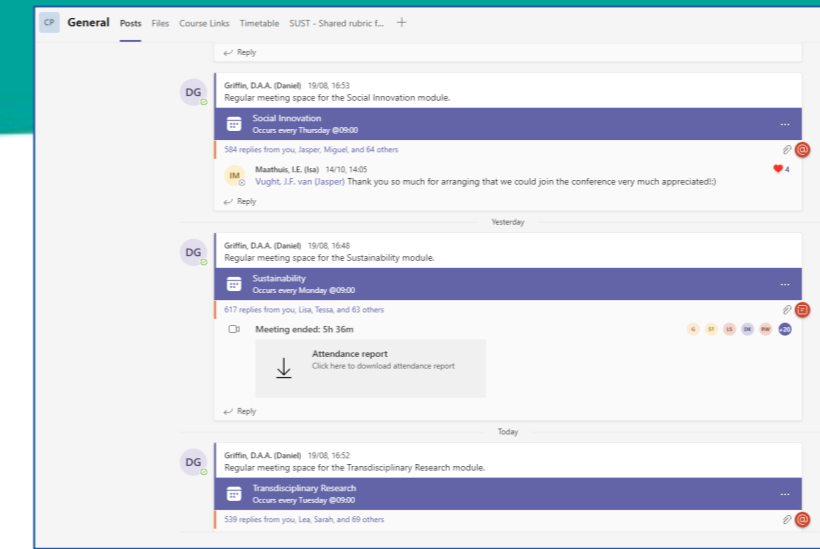

# USE CASES OF THE ENVIRONMENT In class activities

## PHASE 1

The first semester of the pilot master (sept 2021 – feb 2022)

- 3 modules
- Running in parallel
- In class activities: 3 days per week (one per each module)
- Online/selfstudy: 2 days per week

## CORE VLE

MS Teams

General Brainstorming Plenary  
Chat/Channels/workgroups

Moodle

Repository / home study

Scorion

Evaluation, assessment, peer feedbacks

## FLEXIBLE APPS

OneNote

Workgroups

Wooclap

In-class activities

## EMERGING TECHNOLOGIES

Utrecht 2040 game

Out of the building

# Lesson learned so far

## Huge effort for the teaching staff

Teachers have very little room to think about technology enhanced learning. Probably due to:

- Building new modules from scratch with a new assessment model and pedagogical guidelines (probably not an issue next edition)
- Pandemic

To check our actual process: should we afford more time/roles on tech?

## You need to get use to it

The teaching and learning environment (VLE + Hybrid classroom + Emerging tech) is a **new concept**.

We do need to insist on showing the potentiality of the environment and tease the teaching staff on trying new tech.

To plan more teaching induction: should we focus more on professional development?

# Lesson learned so far

## To build from scratch is time consuming!

Underestimation of time/costs needed.

We re-used UU platforms to save time (and money) but a brand new VLE will be optimal. To be aware in the future, Rome wasn't built in a day 😊

→ To check resources we want to dedicate to the VLE.

## Support and ...support again!

The role of teaching assistants in supporting with VLE is crucial during everyday activity

→ To define the current support as a task

## Different identities: too many logins

Teachers have multiple accounts, it is difficult to manage (and not user friendly...).

→ To work asap on a unique identity / access

# How might the future VLE of CHARM-EU develop?

## 1. Go for open-source

Moodle as learning management system / BigBlueButton for virtual classrooms / Next Cloud for collaboration / etc.

Use public money to contribute to openly available software  
No complicated license deals  
Full control of data and no dependencies on suppliers

## 2. More connections/integration

within and with the 2 layers of the VLE

Core-VLE with best of breed apps (Inter-operability)

## 3. Identity and Access Management (IAM)

tool used for controlling and unify user accesses

Student-id / EDU-ID / EDU-Badges / Microcredentials

## 4. More Emergent Technology

VR experiences, gaming, AI, more

EDU-Bot / Learning analytics

## 5. Central/Connected Student Information System (SIS)

EduXchange

# Main challenges and questions for the future

- Who and how will we host, administrate and develop the VLE?
- Do we have the right expertise to do this?  
We're all universities, not software providers.
- When we'll be able to offer a unique CHARM student identity?
- How to involve more the teaching staff on the geek side of the moon?

# CHARM-EU / Toolkit

All the tools and results are accessible in CHARM-EU toolkit. We publish everything as soon as we test them.
